

Custom Software. *Just the way you want it.*

Overview

Communication is becoming less about hardware and networks than it is about software and solutions that enable people to communicate how and when they like. Not to say that we don't need people and companies who understand technology, who know how to design, build and manage the complex networks of wires, fibres, wireless links and devices that form the core of of communications. We do. It is just that we need people who understand how software can enhance and leverage the potential of the underlying technologies to empower us. Umoya Networks is such a company.

We have developed an innovative web based framework that allows us to create software that addresses your specific needs, without taking years to do so. You just have to decide how you want to communicate and where. We take care of the rest.

Your Needs

Whether you need a content driven website, a click-to-dial VoIP enabled company directory system, a network management and monitoring system, or a school management system, the Umoya Networks software development team are willing and able to turn your problem into a solution.

Technology

The following technologies are used extensively in the creation of Umoya Networks software:

- Frontend webscripting: PHP 5
- Load Balancing and High Availability: wackamole and haproxy
- Web Serving: nginx (read: Engine-X) and Apache memcached
- Caching: MySQL and MySQL Replication
- Database: NFS
- File Storage System: Ubuntu Linux Server
- Operating System:

Benefits

Umoya software solutions are:

- Well designed.
- Unique solutions for unique challenges.
- Built to meet your needs, not the way the developer decides it should be.
- Designed to leverage your hardware investment and sweat your assets, making them work harder for you.

Custom Software.

Just the way you want it.

Service

- We listen to your needs and try to probe for some you may not have yet seen;
- We assess your situation and the options open to us and balance quality with budget;
- We design and create the software with care, taking pride in our work;
- We only hand the software over to you when we're sure it is working as intended;
- We support you as promised.

Why Umoya

The Umoya team believe that success is a journey not just a destination. We are competent professionals; passionate people, people of integrity whose word is our bond and who are always up for new challenges in finding appropriate technological solutions to our customers' needs.

Tim Keller, Umoya's Lead Developer has presented at recent developer conferences:

- Microsoft DevDays, March 2009
- Microsoft TechEd Africa, August 2009.

About Umoya

Umoya is licensed ECNS (Electronic Communications Network Service), a member of ISPA (the Internet Service Providers Association) and Unashamedly Ethical.
